Introduction

This guide to government documents at the National Library of Jamaica is aimed at giving researchers and librarians an understanding of the volume and nature of major government publications held at the National Library of Jamaica. Through this guide, users should be able to understand the scope of the most popularly used government serials, books and pamphlets and how these can assist in meeting research needs.

A government document is defined as **“any publication that is printed at government expense or published by authority of a governmental body”** (Katz, 323). Government documents here are selected according to what is published by the Government Printing Office/ Government Printer and other select individual government bodies. The guide is divided into sections and arranged alphabetically by the subject of the publication. However, materials of a general nature dealing with a range of issues are entered under the title “General” and are listed at the beginning of the publication. The lists include current publications and others no longer in print, but are valuable sources for research.

Also included is a chronological history of the Jamaican government, description of the structure of the government, a table of contents, definitions and an index.
